ABOUT FOREX TRADING

Forex trading, also known as foreign exchange or FX trading, is the conversion of one currency into another. FX is one of the most actively traded markets in the world, with individuals, companies and banks carrying out around \$6.6 trillion worth of forex transactions every single day.

WHAT IS CRYPTO TRADING

Crypto trading is the buying and selling of cryptocurrencies to make a profit. Cryptocurrencies are digital assets, like Bitcoin and Ethereum, that are traded on a blockchain network. Cryptocurrency trading is the act of speculating on cryptocurrency price movements via a CFD trading account, or buying and selling the underlying coins via an exchange. Cryptocurrency is digital money that doesn't require a bank or financial institution to verify transactions and can be used for purchases or as an investment. Transactions are then verified and recorded on a blockchain, an unchangeable ledger that tracks and records assets and trades.
